

How to choose nursers:

- Since we should feed according to weight it only makes sense to choose a nurser according to weight as well
- It is much easier to hold a small baby with an appropriate size small nurser and a large baby with an appropriate size larger nurser
- As a baby grows so will their size and volume intake of formula. Please adjust your nurser size accordingly as babies grow

Choose Your Nipple Type:

Please Note that both the Real Feel and Modified Nursers are best suited for babies **THAT CANNOT latch onto a human grade style baby bottle nipple*

Real Feel:

- While these nursers are more "Lifelike" they do require the user to make their own hole in the nipple
- These nursers **DO NOT** come with a premade hole
- You must make your own hole in the nipple with this nurser

Modified:

- These nursers come with a 2 part nipple. The first part is a bulbous overlay nipple that allows babies to attach easily
- The second part is a silicone underlay clear-like nipple that provides the perfect premade hole
- You **DO Not** have to make holes in these nipples as they come with a premade hole already in them

Large Nipple:

Please Note that the Large Nipple nursers are best suited for babies **THAT CAN latch onto a human grade style baby bottle nipple*

- These nursers use a neonatal or human grade type baby bottle nipple and are best suited for medium to larger breeds
- All of the Large Nipple Nursers come with a premade hole and **DO NOT** require the user to make any holes in the nipple
- The 10cc Premie Nurser nipple is about half the size of a regular baby bottle nipple and is great for "Premie" babies in the medium to large size breeds

Please Note: If you are still unsure which nursers to choose email us at: CustomerService@LifelinePetSupplies.com and we will be happy to assist you!
